April 5, 2004

Dear Commissioner,

Enclosed is the notice to file corrected application papers, along with the corrected play game board. Using the new game board with a perimeter scale should reconcile the problem of using graph paper to submit the drawings on. This submission we hope to win a patent for a golf board game that plays like the real game of golf with simulated clubs and scoring like the real game of golf that can be played at home or even in the family car.

I appreciate your time in reviewing my idea of a family board game of golf and hope it is favorable. Please if I can answer any question contact me.

Sincerely,

A handwritten signature in cursive script, appearing to read "Mary K. Graham".

Mary K. Graham
